Supplementary after-school childcare rates 2020.

1. The amount that you ultimately pay for your childcare is lower than the monthly rate as stated. This is because – if you qualify for this – you will receive an allowance for childcare costs from the Tax and Customs Administration: childcare allowance. This supplement is partially calculated using the national standard. The national standard for after-school care is € 7.02. Use the calculation tool on our website to get an indication of your net childcare costs.
2. This monthly rate is based on the school closing time of 15.15 hours. Your actual monthly rate depends on the closing time of your school. Childcare is invoiced up to a school closing time of 18:30.
3. This monthly rate is based on a school closing time of 12.00 hours. Your actual monthly rate depends on the closing time of your school. Childcare is invoiced up to a school closing time of 18:30.
4. In the case of flexible care, you take at least two half-days a month. Please let us know before the 15th of the previous month which half-days you want to buy. Only then will the requested half-day periods be guaranteed. You can find the rules for flexible childcare on our website.
